

# CONTENTS

<b>1</b>	<b>THE PHYSICS OF LIGHT</b>	<b>1</b>
1.1	Nature of light	1
1.2	Process of vision	3
1.3	Production of light	6
1.3.1	Thermal radiation	6
1.3.2	Luminescent radiation	7
1.4	Photometric quantities	9
1.4.1	Luminous flux	9
1.4.2	Luminous intensity	10
1.4.3	Illuminance	12
1.4.4	Luminance	15
1.5	Optical design	18
1.5.1	Reflection	18
1.5.2	Refraction	21
1.5.3	Transmission	24
1.5.4	Absorption	24
<b>2</b>	<b>THE HUMAN VISUAL SYSTEM</b>	<b>39</b>
2.1	Optical performance of the eye	39
2.1.1	Adaptation	42
2.1.2	Accommodation	43
2.1.3	Depth perception	43
2.1.4	General condition of the eye	44
2.2	Visual performance (capabilities of the visual system)	45
2.2.1	Visual acuity (sharpness of vision)	45
2.2.2	Luminance contrast and luminance contrast sensitivity	46
2.3	Visual comfort	47
2.3.1	Glare	47
2.3.2	Flicker	48
2.4	Colour	49
2.4.1	Generally on colour	49
2.4.2	Colorimetric systems, colour spaces and chromaticity diagrams	51
2.4.3	Colour temperature and correlated colour temperature	56

2.4.4	Colour rendering	58
2.4.5	Chromatic adaptation	61
<b>2.5</b>	<b>Brightness as a complex sensation</b>	<b>61</b>
<b>3</b>	<b>LIGHT SOURCES</b>	<b>67</b>
<b>3.1</b>	<b>Generally on light sources</b>	<b>67</b>
<b>3.2</b>	<b>Incandescent lamps</b>	<b>68</b>
3.2.1	General lighting service lamps	72
3.2.2	Reflector lamps	72
3.2.3	Tungsten halogen lamps	72
<b>3.3</b>	<b>Discharge lamps</b>	<b>74</b>
3.3.1	Low-pressure discharge lamps	75
3.3.2	High-pressure discharge lamps	84
3.3.3	Induction and plasma lamps	89
<b>3.4</b>	<b>Light Emitting Diodes (LEDs)</b>	<b>89</b>
3.4.1	White light LEDs used in street and ambient lighting	91
3.4.2	Colorimetric characteristics of white LED packages	92
3.4.3	Lifetime of LED drivers	93
3.4.4	Adaptive systems for white LEDs	93
3.4.5	Heat dissipation from LED luminaires	94
3.4.6	Ecological aspects of the application of LED luminaires	96
3.4.7	Maintenance factor of LED luminaires	96
3.4.8	Adjustment of luminous intensity and colour of light of RGB LED luminaires	97
3.4.9	LED binning	97
3.4.10	Special applications of LEDs in urban lighting	97
3.4.11	Health aspects of the application of LED luminaires	98
3.4.12	OLEDs and PLEDs	100
<b>4</b>	<b>LUMINAIRES</b>	<b>107</b>
<b>4.1</b>	<b>Generally on luminaires</b>	<b>107</b>
<b>4.2</b>	<b>Luminaire optical parts</b>	<b>110</b>
4.2.1	Reflectors	110
4.2.2	Outer optical covers	111
4.2.3	Lenses	113
4.2.4	Screening elements	113
4.2.5	Colour filters	114
<b>4.3</b>	<b>Physical protection of luminaires</b>	<b>115</b>
<b>4.4</b>	<b>Luminaires intended for harsh environments</b>	<b>115</b>

<b>4.5</b>	<b>Luminaire photometric data</b>	<b>116</b>
4.5.1	The luminous intensity table	116
4.5.2	Polar diagrams	118
4.5.3	Luminaire efficiency	119
4.5.4	Other luminaire photometric data	123
<b>4.6</b>	<b>Classification of luminaires</b>	<b>123</b>
4.6.1	Classification according to the degree of protection against solid particles and moisture	123
4.6.2	Classification according to the degree of protection against external mechanical impacts	124
4.6.3	Classification of floodlights	124

## **5 STREET AND ROAD LIGHTING** **131**

<b>5.1</b>	<b>Street (road) lighting parameters and requirements</b>	<b>131</b>
5.1.1	Generally on street (road) lighting	131
5.1.2	Visual performance and visual comfort for drivers	132
5.1.3	Visual performance and visual comfort for pedestrians and cyclists	137
5.1.4	Lighting of conflict areas	138
<b>5.2</b>	<b>Street (road) lighting classes for motorised or mixed traffic</b>	<b>139</b>
<b>5.3</b>	<b>Street lighting classes for pedestrian or low-speed motorised traffic</b>	<b>142</b>
<b>5.4</b>	<b>Standard pole (luminaire) layouts</b>	<b>143</b>
5.4.1	Streets (roads) with no central reserve	143
5.4.2	Dual carriageways	146
<b>5.5</b>	<b>Calculation of the street (road) lighting quality factors</b>	<b>147</b>
5.5.1	Field of observation	147
5.5.2	Field of calculation	148
5.5.3	Points of calculation and influencing luminaires	148
5.5.4	The position of the observer when calculating the luminance level and uniformities	150
<b>5.6</b>	<b>Roadway surfaces and lighting</b>	<b>150</b>
5.6.1	Luminance coefficient	150
5.6.2	Representation of the roadway surface by a table with reduced luminance coefficients	152
5.6.3	The R-classification system	154
5.6.4	The portable reflectometer Memphis	156
<b>5.7</b>	<b>Maintenance of street (road) lighting installations</b>	<b>160</b>
<b>5.8</b>	<b>Lighting control: adaptive devices and systems used in street (road) lighting</b>	<b>162</b>
5.8.1	Step-dimming ballasts	162
5.8.2	Adaptive devices	163
5.8.3	Telemanagement systems	163

5.9	Inclusion of mesopic effects when designing street (road) lighting	166
5.10	Comparison of electronic and conventional ballasts used in street (road) lighting	169
5.11	Luminaires powered by solar panels	170
5.12	Recommendations for energy savings in street (road) lighting	170
5.13	Economic comparison of different street (road) lighting installations	172
5.14	Calculation of the payback period for the investment when reconstructing a street (road) lighting installation	175
<b>6</b>	<b>ARCHITECTURAL LIGHTING</b>	<b>189</b>
6.1	Generally on architectural lighting	189
6.1.1	Luminance level and distribution	191
6.1.2	Colour of light	192
6.1.3	Colour rendering	193
6.1.4	Glare control	193
6.1.5	Shadows	194
6.1.6	Compatibility of the luminaires and poles with their immediate surroundings	194
6.2	Recommendations for the illumination of buildings	194
6.3	Recommendations for the illumination of bridges	227
6.3.1	Generally on the illumination of bridges	227
6.3.2	Illumination of beam bridges	228
6.3.3	Illumination of arched bridges	229
6.3.4	Illumination of steel truss bridges	230
6.3.5	Illumination of suspended bridges with pylons	233
6.3.6	Illumination of modern bridges	237
<b>7</b>	<b>AMBIENT LIGHTING</b>	<b>243</b>
7.1	Illumination of urban ambients	243
7.2	General guidelines for ambient lighting	245
7.3	General recommendations for ambient lighting	246
7.4	Specific recommendations for the illumination of urban squares	248
7.5	Specific recommendations for the illumination of parks	250
7.6	Specific recommendations for the illumination of pedestrian paths	251
7.7	Case studies regarding the illumination of a square, park and pedestrian path	252
7.7.1	The illumination of Republic Square, Novi Sad, Serbia	252
7.7.2	The new lighting solution for Tasmajdan Park in Belgrade, Serbia	256
7.7.3	The illumination of Knez Mihailova Street in Belgrade, Serbia	260
7.8	Illumination of urban fortifications	260
7.9	Illumination of archaeological sites	262

<b>7.10</b>	<b>Illumination of sculptures and fountains</b>	<b>265</b>
7.10.1	Illumination of sculptures	265
7.10.2	Illumination of fountains	270
<b>8</b>	<b>LIGHTING MASTERPLANNING</b>	<b>277</b>
<b>8.1</b>	<b>Introduction</b>	<b>277</b>
8.1.1	What is a masterplan?	277
8.1.2	Objectives of lighting masterplans	278
8.1.3	Urban entities treated by lighting masterplans	280
8.1.4	Presentation of a lighting masterplan	282
8.1.5	Target groups	282
<b>8.2</b>	<b>Selection of landmarks</b>	<b>285</b>
8.2.1	City landmarks, silhouettes and panoramic views	285
8.2.2	Criteria for selecting landmarks and determining their hierarchy	288
<b>8.3</b>	<b>Guidelines for zoning within a city lighting masterplan</b>	<b>290</b>
8.3.1	Boundaries	290
<b>8.4</b>	<b>Analysis of the current state of urban lighting</b>	<b>292</b>
<b>8.5</b>	<b>Standard (typical) street lighting installations</b>	<b>293</b>
8.5.1	Signage, advertising and video displays	295
<b>8.6</b>	<b>General requirements for luminaires intended for street and ambient lighting</b>	<b>296</b>
<b>8.7</b>	<b>A city street lighting map</b>	<b>297</b>
<b>8.8</b>	<b>Lighting intended for cultural, educational, entertainment or communication purposes</b>	<b>299</b>
8.8.1	Media facades as a communication tool	302
<b>8.9</b>	<b>Dynamic light shows and spaces adequate for their application</b>	<b>302</b>
8.9.1	Objectives of dynamic light shows	303
8.9.2	Spaces suitable for dynamic light shows	303
<b>8.10</b>	<b>Energy efficiency in urban lighting</b>	<b>305</b>
<b>8.11</b>	<b>Maintenance of urban lighting</b>	<b>305</b>
<b>8.12</b>	<b>Other aspects of lighting masterplanning</b>	<b>307</b>
8.12.1	The environmental aspect of urban lighting	307
8.12.2	The economic aspect of urban lighting	307
8.12.3	Phased implementation of the lighting masterplan	308
8.12.4	Outdoor lighting of buildings belonging to the private sector	308
